

**TRUSTiCERT is an independent SME acting globally
as regulatory and scientific partner in the development of vaping sector.**

“We blend Science, Compliance and Innovation to support health through the diffusion of new technologies.”

SCIENCE

Science is the basis of TRUSTiCERT efforts to guide its customers in placing safe products on the market.

“5 years experience in toxicological assessment of e-liquids flavors allowed us to develop an innovative integrated approach that simulates vaping and its effects on human lungs”

COMPLIANCE

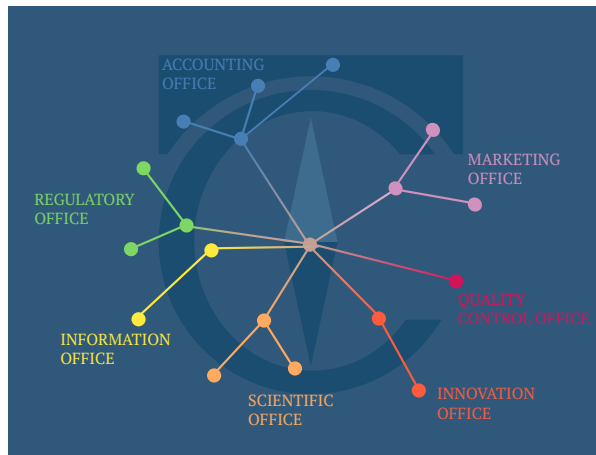

Compliance draws the boundaries in which technology and innovation can act: TRUSTiCERT is the guide to proceed safely.

*“We are professionals of regulatory affairs, providing our customers comprehensive assistance for EU and US. We support compliance at 360**”*

INNOVATION

High-quality R&D activities are strategic to raise the company competitiveness through the improvement of products.

“We are a trusted partner that can guarantee a strong skill background and a solid history, thanks to our team of professionals with degrees in biological, chemical and IT sciences.”

TRUSTiCERT **roots** are in the University, where since 2012 the founder and CEO Emanuele Ferri has been coordinating a team of researchers to study the scientific aspects relating to e-cig.

Today TRUSTiCERT is composed by seven departments with seven Ph. D in strategic positions.

Thanks to several **agreements** with **certified laboratories**, TRUSTiCERT benefits from the most advanced technologies to fully satisfy the requirements imposed by the legislation landscape.

TRUSTiCERT is **UNI Effective Member** and is an **active player** in the construction of the **standards for e-cigs** and refill liquids, taking part to several Technical Commissions.
